Office of Legislative Counsel

Wednesday - 8 June 1955

25X1A 1. In reply to the inquiry of Sen. Ives' office, I informed Miss Davis that [] had difficulties with his supervisors and had been transferred to a different position because of this once and his work performance continued to be unsatisfactory, and that he resigned in the face of the proposed issuance of a 90 day warning letter. In connection with this letter, we proposed again to transfer him to another project in view of his complaints about his supervisor and warned him that his work was below that required of a person holding a GS-13 rating. I stated that [] had not only had full consideration from the Personnel Office, but also had his case reviewed by the Inspector General's office, who concurred in the findings. Miss Davis said that they were interested in our side of the story in view of [] request of the 25X1A Senator's office to secure a hearing and that she appreciated receiving this information.

2. The House has passed H.R. 3882, containing certain additional exemptions from the registration provisions of those who have knowledge of foreign intelligence systems. Two of these sections have been included at the request of CIA. The bill now goes to the Senate where it failed of passage in the last Congress. However, it is possible that it will receive 25X1C a more sympathetic hearing this year.

4. I spoke with Lyman Hamilton of the Bureau of the Budget regarding the possibility that Congressional action might make it almost mandatory for CIA to locate its new headquarters at Langley, Virginia. If this is so, it would be necessary for us to revive legislation authorizing CIA to receive funds which could be utilized in the extension of the George Washington Parkway to the Public Roads site.
